✕ Statistically higher than the U.S. white rate.

★ Statistically lower than the U.S. white rate.

-- Not calculated when total number of deaths for the five-year period is fewer than 6.

TECHNICAL NOTES:

All rates are age adjusted to the 2000 U.S. standard population and exclude basal cell and squamous cell skin cancers. Rates based on 5 or fewer deaths are not individually calculated. The U.S. rates are based on the Vital Statistics System of the United States Public use database. U.S. rates are 2000-2004 white population mortality rates.
